

India Industry Internships in Bangalore 2018

Are you a student at a Swiss Federal Institute or a Swiss University of Applied Sciences looking for an exciting internship in Automation/Robotics and open to work in a fast growing emerging country?

If yes, the India Industry Internship program might be for you!

The India Industry Internships (III) is an internship program run by swissnex India in partnership with ETH Zurich, HEIG-VD, HSR, SUPSI and Gebert Rűf Stiftung. It offers the exciting opportunity for students from Swiss universities to do a 3-months industrial internship in the fields of Robotics and Automation at our partner companies in Bangalore – a city known as the ‘Silicon valley of India’.

This year there are 14 projects to choose from. Dates are flexible depending on the academic calendar. Interns get a living allowance of INR 65'000 (ca. CHF 950) to cover expenses for accommodation, food and local transportation. Flight and visa costs are reimbursed (up to CHF 1000).

Why India?

- Be exposed to an alternative engineering culture and environment
- Gain intercultural experience at an early stage – both personally and professionally
- Get inspired by the dynamic Indian cities and businesses

Eligibility

Students in Computer Science, Mechanical Engineering, Robotics, Electrical Engineering, Biomedical Engineering or similar study areas in advanced semesters (3rd year of Bachelor or above). Students who take a gap year between their Bachelor and Master studies or have graduated within one year from the start of the internship are also eligible to apply. To know more visit <http://iiinternships.org/>

Application

The application period is open until **4th March 2018 at 5PM Swiss time**. The link to the application form and project descriptions can be accessed via the III website or the direct link: <https://goo.gl/DGJjX5>
